

# 2020 Tufts Class Survey

**Sample:** A sample of 1,215 American adults provided by Lucid was interviewed online on October 25, 2020.

**Weights:** Post-stratification weights are implemented to make each week's sample nationally representative of American adults by gender, age, region, education, race, and 2016 presidential vote. Adult population targets defined using the most recent 5-year American Community Survey. Likely voter weights created using the PGAD approach described [here](#).

I am a researcher from Tufts University, in Massachusetts. I am conducting a research study to learn more about your views towards important policy issues related to the presidential election. This survey will ask you some questions for my research. It will take approximately 12 minutes of your time.

It's your decision, and there are no consequences to saying no. I don't anticipate any major risks to participation, but you may feel uncomfortable answering some questions. If at any time during the survey you want to stop participating, you are free to end your participation by closing the survey on your computer or device.

You will receive compensation based on your agreement with the survey company.

Your responses may be used in publications or presentations. I will not possess nor share identifiable information about you. All de-identified data from this survey will be shared publicly on Dataverse, an online research data repository.

Below you can find my contact information and the contact information of the research oversight board at Tufts, the Tufts SBER IRB, if you need to get in touch about this research at any point in the future.

For questions or concerns about the research study or procedures, or if you need to notify someone of a complaint, please contact the researcher:
